

Bioscience Resource Project

Thursday, February 26, 2015
7:00pm – 9:00pm
First Baptist Church
309 North Cayuga Street
Ithaca, NY

***FREE AND OPEN TO THE
PUBLIC***

**Beyond the Ban: Fracking, Health & Infrastructure in
New York State from Port Ambrose to Seneca Lake**

with Robert Oswald, Michelle Bamberger, and Sandra Steingraber

More about this Event: The DEC promises to prohibit high volume hydraulic fracturing—a courageous act by Governor Cuomo—but what of the risks faced by many New Yorkers from pipelines, compressor stations, gas storage caverns and export terminals? If this infrastructure continues its rapid expansion across our state, what are the potential impacts to people, animals and the food shed? What is the current status of each project?

Hosted by the Bioscience Resource Project— Sandra Steingraber (author of “Raising Elijah” and “Living Downstream”, and Distinguished Scholar in Residence at Ithaca College) will join veterinarian Michelle Bamberger and Cornell professor of molecular medicine Robert Oswald, authors of “The Real Cost of Fracking,” for a public discussion of the crucial issues.

Buffalo Street Books will
have books for sale at this
event.
